INTERNATIONAL CONFERENCE ON COMPLEX ANALYSIS AND RELATED TOPICS

The 12th Romanian-Finnish Seminar

August 17-21, 2009, Turku, Finland

First Announcement

The 12th Romanian-Finnish Seminar will take place in Turku, August 17-21, 2009. The collaboration between the Romanian and Finnish mathematicians in Geometric Function Theory and Classical Analysis was initiated by Simion Stoilow and Rolf Nevanlinna, and this series of conferences deals with the current trends of the field.

The conference is organized by the Universities of Turku, Helsinki, and Joensuu from Finland, in cooperation with the Institute of Mathematics "Simion Stoilow" of the Romanian Academy and with the Faculty of Mathematics and Informatics of the University of Bucharest.

Organizing Committee: M. Vuorinen (Turku) (chair), I. Laine (Joensuu), O. Martio (Helsinki), C. Andreian Cazacu (Bucharest), L. Beznea (Bucharest), A. Gheondea (Bucharest), G.S. Salagean (Cluj-Napoca).

The program is divided into sections as follows:

1. Geometric function theory and classical complex analysis,

2. Quasiconformal mappings and Teichmüller spaces,

3. Potential theory and PDEs, geometric analysis, metric geometry and related topics in classical analysis.

There will be invited and contributed lectures and poster sessions. Participants intending to give a lecture are requested to send a one-page abstract by e-mail. The preferred formats are Latex and plain text. For more information about submission of abstracts and registration see the conference webpage.
The deadline for early registration is April 30, 2009.

The Second Announcement will be published in March 2009. For additional information contact the Organizing Committee:
